2.2. Management Status

(1) Overview of the Fiscal Period under Review

A. Brief History of the Investment Corporation

Investment Corporation was established on July 11, 2005 in accordance with the Act on Investment Trusts and Investment Corporations (Act No. 198 of 1951; including amendments thereto) with Daiwa Real Estate Asset Management Co., Ltd. (former name K.K. daVinci Select) (the "Asset Manager") as the organizer. After its establishment, the Investment Corporation implemented an additional issuance of investment units through a public offering (99,600 units) on October 18, 2005 and then listed on the Tokyo Stock Exchange, Inc. (TSE) Real Estate Investment Trust Section (stock code: 8976) on the following day.

Though initial assets under management were 79,573 million yen (sum total of acquisition price), subsequent activities, such as additional acquisition of properties and replacement of portfolio properties, resulted in the assets under management amounting to 469,341 million yen as of the last day of May 2017.

The Investment Corporation strives to secure stable revenue and sustained growth of the investment assets based on a clear portfolio development policy of specializing in investment in office buildings, with a particular focus on investment in a total floor area of more than about 2,000 m^2 situated in downtown Tokyo, as well as through dedicated efforts to heighten tenant satisfaction levels.

B. Investment Environment and Management Performance

a. Investment Environment (from December 2016 to May 2017)

The Japanese economy during the fiscal period under review continued to show a modest recovery trend with real GDP growth rate (Second Preliminary Estimates) for January to March 2017 at an annual rate of 1.0%, recording a positive figure for five consecutive quarters under the ongoing quantitative/qualitative monetary easing policy by the Bank of Japan.

In the office building leasing market in central Tokyo, with new supply having settled down, the vacancy rate took a turn after peaking in June 2013, dropping to 3.41% at the end of May 2017. Led by improvement in the vacancy rate for existing large buildings, the overall vacancy rate that includes small- to medium-sized buildings also continues to be on an improving trend. The drop in the vacancy rate has led to an increase in office rent in some areas, and the market as a whole continues to see increase in rent, albeit slight.

For the office building transaction market, an appetite for property acquisitions continued to be strong among real estate companies, funds (including J-REITs) and oversea investors with the continuing proactive lending attitude by financial institutions backed by the forecast of an increase in property prices in accordance with expectations for economic recovery.

b. Management Performance

In view of increasing the long-term EPS (EPS (net income per unit) after deducting gain on sales of properties) over the medium to long term, the Investment Corporation continued to work on "external growth," which aims to boost revenue through acquisition of properties, and "internal growth," which aims to maximize income generating from owned properties.

Concerning external growth, the Investment Corporation acquired "Shin Kanda Mikura-cho Building" (acquisition price: 1,592 million yen) in December 2016. As a result, the Investment Corporation's assets under management as of the end of the 23rd Fiscal Period (May 31, 2017) totaled 54 properties, the sum total of acquisition prices of which amounted to 469,341 million yen.

Concerning internal growth, while the office leasing market trended recovering, the Investment Corporation conducted proactive leasing, such as capturing needs for floor expansion within the same property through strengthening relationships with existing tenants and reinforcing collaboration with leasing brokers and property managers. Consequently, the occupancy rate as of the end of the 23rd Fiscal Period (May 31, 2017) was 97.7%.

C. Overview of Capital Procurement

a. Procurement of Capital for Repayment of Borrowings

In the 23rd Fiscal Period, the Investment Corporation made the following borrowings to fund the repayment of borrowings

that were due for repayment.

- A total amount of 1,700 million yen was borrowed from Development Bank of Japan Inc. on May 10, 2017 to fund the repayment of the same amount borrowed from the bank due the same day.
- A total amount of 6,500 million yen was borrowed from Development Bank of Japan Inc. on May 22, 2017 to fund the repayment of the same amount borrowed from the bank due the same day.
- A total amount of 9,500 million yen was borrowed from Sumitomo Mitsui Banking Corporation, Sumitomo Mitsui Trust Bank, Limited and Mizuho Trust & Banking Co., Ltd. on May 31, 2017 to fund the repayment of the same amount borrowed from the respective banks due the same day.

Furthermore, in the 23rd Fiscal Period, the Investment Corporation concluded the interest-rate swap agreement for the total borrowing of 13,000 million yen with floating interest rates in order to offset the risks of the possible increase of the interest rate in the future.

b. Status of Interest-Bearing Liabilities at End of the Fiscal Period under Review

As a result of the above, the balance of interest-bearing liabilities outstanding as of the end of the 23rd Fiscal Period (May 31, 2017) stood at 204,300 million yen (short-term loans payable: 1,000 million yen; long-term loans payable: 198,200 million yen; investment corporation bonds: 5,100 million yen). The balance of the current portion of long-term loans payable stood at 19,400 million yen.

The average remaining period of interest-bearing liabilities as of the end of the 23rd Fiscal Period stands at 4.3 years.

D. Overview of Financial Performance and Distributions

As a result of the management described above, the Investment Corporation posted financial performance for the 23rd Fiscal Period of 12,547 million yen in operating revenue, 6,133 million yen in operating income, 5,360 million yen in ordinary income and 5,359 million yen in net income.

Concerning distributions, it is planned that the amount equivalent to distributions from earnings would be included in the amount of tax-deductible expenses based on application of special provisions for taxation of corporation tax (Article 67-15 of the Act on Special Measures Concerning Taxation (Act No. 26 of 1957; including amendments thereto) (the "Special Taxation Measures Act")). Accordingly, the Investment Corporation decided to distribute almost the entire amount of unappropriated retained earnings (excluding fractions of the distribution amount per unit that are less than 1 yen), and declared a distribution amount per unit of 10,764 yen.

(2) Outlook for the Next Fiscal Period

A. Investment Environment

The Japanese economy going forward is expected to see a moderate economic recovery through solid trends in personal spending against the backdrop of favorable employment environment and the improved income environment while various economic measures, centering on the public works projects promoted by the current administration and the monetary easing policy implemented by Bank of Japan continue. However, factors, such as policies to be set out by the U.S. President Donald Trump, the downward swing of the Chinese economy, upset in emerging markets accompanying the U.S. "exit strategy," "risk off" due to geopolitical risks and political risks, the Brexit negotiations and deleveraging by European financial institutions, pose potential risks of disrupting the Japanese real economy and financial environment, and are thus thought to require attention.

In the Tokyo office building leasing market, factors such as improvement in employment are stimulating demand, resulting in the vacancy rate dropping. Improvement in corporate performance is forecasted to increase demand for office floor space and rent is expected to improve as a consequence. In the office building transaction market, backed by the favorable financing environment and expectations of rent rising, among other factors, property acquisition appetite among investors overseas, real estate companies and funds (including J-REITs) is thought to remain strong.

B. Future Management Policy and Tasks

a. Strategy for Managing Existing Properties

Despite such office leasing market conditions as described above, the tenant side is, as it has been, also expected to become more heavily selective with properties in terms of software such as crime/disaster prevention measures and operations/management on top of location and building specifications. Consequently, the Investment Corporation will carry out operational management under the following policy with an aim to enhance the competitiveness of existing properties and thereby increase the long-term EPS over the medium to long term.

(i) Maintain and raise occupancy rates

Concerning existing tenants, strive to reduce vacancy risks by improving the quality of buildings, equipment and management system. In addition, concerning new tenants, strive to maintain and raise occupancy rates through the provision of highly satisfactory services from gaining deeper understanding of tenant needs through proactive participation in the market.

- (ii) Maintain and raise profitability Aim to secure stable revenue over the medium to long term through further strengthening good relationships with existing tenants, as well as proactively tapping the needs of new tenants by discerning the market environment.
- (iii) Lower operational management costs Strive to lower operational management costs based on maintaining office environments of high tenant satisfaction levels by implementing efficient operational management and reviewing systematic construction work by optimally leveraging the economies of scale achieved from proactively realizing external growth.

b. Strategy for New Property Investments

The Investment Corporation will invest in office buildings that have a total floor area of about 2,000 m^2 or more based on various external growth strategies, while maintaining a balance with the asset acquisition environment and financing situation. In principle, considerations will focus on Tokyo as the investment target area, but the Investment Corporation will also consider investing in competitive properties in cities other than Tokyo from a viewpoint of territorially-distributed investments.

As pipeline support, in addition to expanding its own information-sourcing channels, the Investment Corporation will continue to search for properties that meet its investment criteria by proactively gathering real estate transaction market information through greater collaboration with the Asset Manager and Sponsor Group and utilizing the Group's extensive network of clients, partners, etc.

Furthermore, in the 23rd Fiscal Period, the Investment Corporation acquired "Shin Kanda Mikura-cho Building," which is located in Tokyo. The Investment Corporation believes that acquisition of this property will contribute to further stabilization and enhancement of the portfolio. The Investment Corporation will continue to strive to acquire properties in line with the investment strategy described above.

c. Financial Strategy

The Investment Corporation will conduct disciplined financial management of the following basic content.

- (i) Control leverage by keeping the ratio of interest-bearing liabilities to total assets (LTV) within the range of 40% to 50% at maximum, taking into consideration also the real LTV, etc., as a principle.
- (ii) Diversify repayment deadlines, targeting 30.0 billion yen as the maximum amount of interest-bearing liabilities that shall become due during any single fiscal period as a principle.
- (iii) Aim to have long-term loans account for at least 70% of total loans as a principle.
- (iv) Achieve diversification of lenders, which shall mainly be Japanese financial institutions.
- (v) Pursuant to its fund management rules, maintain stability in its financial standing by managing necessary funds, such as the amount equivalent to distributions paid, separately from working capital.

C. Significant Subsequent Events

Not applicable.

(Reference Information)

The Investment Corporation acquired a silent partnership equity interest on June 1, 2017 as follows.

[Notes to Financial Instruments]

(1) Matters Concerning Status of Financial Instruments

(a) Policy for financial instruments

The Investment Corporation raises funds through bank borrowings, issuance of investment corporation bonds and issuance of new investment units, etc. for the acquisition and repair of investment properties, the payments of dividends and the reimbursement of bank borrowings.

As for debt finance, the Investment Corporation focuses on lengthening maturities, fixing interest rates, and dispersing maturity dates in order to secure financial stability and avoid future fluctuation risk of interest rates.

The Investment Corporation manages surplus funds through deposits and safe and highly liquid money claims and securities (in principle, deposits).

Derivative transactions are limited to hedge operations which hedge against interest rate risks attributable to liabilities of the Investment Corporation.

(b) Contents and risk of financial instruments and related risk management

The Investment Corporation uses the proceeds from the financing of debts and investment corporation bonds for the acquisition of investment properties (such as trust beneficial interest in real estate) and the reimbursement of current debts and bonds. While these debts and bonds are exposed to liquidity risk, the Investment Corporation manages the risk by maintaining the LTV ratio at low levels, dispersing maturity dates, maintaining the ratio of long-term debt to total debt at high levels, and diversifying lenders with particular focus on domestic financial institutions.

Bank borrowings etc. with floating interest rates are exposed to interest rate risk and the risk is controlled by using derivative instruments (interest rate swap transaction) for some long-term borrowings to avoid interest rate rise and to fix interest expense.

The effectiveness of hedging is assessed by the correlation between the change in aggregated amount of cash flow of the hedging instruments and the change in aggregated amount of cash flow of the hedged items. Interest rate swaps that meet the requirements for special accounting are omitted from assessment of the effectiveness.

Enforcement and management of derivative transactions are carried out in accordance with the provisions established by the basic policy of risk management. Tenant leasehold and security deposits and tenant leasehold and security deposits in trust are exposed to liquidity risk upon tenants moving out and the Investment Corporation reduces the risk by pooling funds to a certain degree.

Surplus funds by deposits are exposed to credit risk of counterparties (financial institutions and so on) and are managed by limiting the terms to short durations and establishing credit rating level of counterparties (except for checkable deposit), etc.

(c) Supplementary explanation for fair value of financial instruments

The fair value of financial instruments is based on their market price. The fair value of financial instruments with no available market price is determined by using price reasonably estimated. As various factors are incorporated into these calculations, the resulting value may differ if different assumptions are provided. Furthermore, the contractual amounts of derivative transactions do not represent the market risk involved in these derivative transactions.

(2) Matters Concerning Fair Value, etc. of Financial Instruments

The carrying amounts and fair values and their differences are as follows. Please note that the following table does not include those for which discerning of fair value is recognized to be extremely difficult (please refer to (Note 2)).

(*)The value of receivables and payables arising from derivatives are indicated at net basis. The amount in parentheses represents the net liability position.

(Note 1) Methods to estimate fair value of financial instruments and matters concerning derivative transactions.

Assets

(1) Cash and deposits; (2) Cash and deposits in trust

As these are settled within a short period of time, the fair value is approximately the same as the book value and thus is stated at that book value.

Liabilities

(3) Short-term loans payable; (4) Current portion of long-term loans payable; (6) Long-term loans payable

As those with floating interest rates reflect market interest rates within a short period of time and the Investment Corporation's credit capability does not differ markedly from the execution, the fair value is approximately the same as the book value and thus is stated at that book value. Those with fixed interest rates, on the other hand, are based on the method of calculating by discounting the sum total amount of principal and interest (*) by the reasonably estimated interest rate in the case that the same type of borrowings are undertaken.

(*) For long-term loans payable that are subject to special accounting for interest rate swaps, the interest is handled together with applicable interest rate swaps. (Please refer to [Notes to Derivative Transactions] below.)

(5) Investment corporation bonds

The fair value of the investment corporation bonds issued by the Investment Corporation is based on the market price.

Derivative transactions

Please refer to [Notes to Derivative transactions] below.

(Note 2) Financial products for which it is extremely difficult to estimate fair value.

| Tenant leasehold and security deposits in trust | 504,267 | 504,009 |
| Total | 16,952,099 | 17,272,308 |

Tenant leasehold and security deposits and tenant leasehold and security deposits in trust that are deposited by lessees of rental properties are not subject to disclosure of fair value because discerning of the fair value is recognized to be extremely difficult as future cash flows cannot be reasonably estimated due to there being no market price and difficulty in calculation of the actual deposit period, which is the period from tenants' move-ins to move-outs.

(Note 3) "Major Regional Cities" means Osaka area (i.e., Osaka, Kyoto and Hyogo prefectures), Nagoya area (Aichi, Mie and Gifu prefectures) and ordinance-designated cities and core cities under the Local Autonomy Act.

(Note 4) Acquisition price is excluding acquisition costs, fixed property tax, city planning tax, consumption tax and local consumption tax.

(Note 5) Carrying amount is the book value after depreciation as of May 31, 2017.

(Note 6) Estimated price at end of period is the price as of May 31, 2017 stated in appraisal reports prepared by real estate appraisers of Tanizawa Sogo Appraisal Co., Ltd., Daiwa Real Estate Appraisal Co., Ltd., Morii Appraisal & Investment Consulting, Inc. and Japan Real Estate Institute in accordance with the articles of incorporation of the Investment Corporation and the rules of The Investment Trusts Association, Japan.

(Note 7) Investment ratio is the acquisition price of each property expressed as a percentage of the total amount of acquisition prices, rounded to one decimal place.

(Note 8) For Daiwa A Hamamatsucho Building and Shinjuku Maynds Tower, the figures are those pertaining to the Investment Corporation's ownership interest.

(Note 9) The Investment Corporation changed the names of assets under management from River Gate to Daiwa River Gate, Heiwa Higashi-nihonbashi to Daiwa Higashi-nihonbashi, Meguro Place Tower to Daiwa Meguro Square, Ogikubo TM Building to Daiwa Ogikubo and Kitahama Grand Building to Daiwa Kitahama on April 1, 2017; from Concept Aoyama to Daiwa Aoyama on May 1, 2017; and from Azabu Green Terrace to Daiwa Azabu Terrace on June 1, 2017. The same applies hereinafter in this document.

- (Note 1) "Structure and number of floors" are the entries in the real estate registry of the building of the applicable investment real estate property. "S" refers to steel-framed structure, "RC" refers to reinforced concrete structure, "SRC" refers to steel-framed reinforced concrete structure, "B" refers to floors below ground and "F" refers to floors above ground.
- (Note 2) "Construction completion" is the entry in the real estate registry of the building of the applicable investment real estate property.
- (Note 3) "Leasable floor area" represents the floor area of the building of the applicable property that is leasable, not including the leasable area of the land (including level parking space), and is the floor area indicated in the lease contract, etc. as of May 31, 2017.
- (Note 4) "Leased floor area" is the sum total of the floor area that is actually leased based on lease agreements, etc. executed with end-tenants as of May 31, 2017.
- (Note 5) "Total number of tenants" is the number of end-tenants. When there is a tenant occupying multiple buildings, the concerned tenant is counted and stated for each individual building.
- (Note 6) "Occupancy rate" is the figure arrived at when leased floor area is divided by leasable floor area, rounded down to one decimal place.
- (Note 7) "Rent revenue during current period" is rent income, common area charges income, parking lot income and other income generated from the applicable investment real estate property (excluding other lease business revenue) during the 23rd Fiscal Period, rounded down to the nearest thousand yen.
- (Note 8) Not shown for such reasons as consent was not obtained from major tenants to disclose the rent revenue during current period for the properties.
- (Note 9) The real estate in trust pertaining to trust beneficial interest held by the Investment Corporation is the common ownership interest corresponding to six-sevenths of the entire property. Accordingly, leasable floor area and leased floor area are the floor areas corresponding to six-sevenths of the entire building.
- (Note 10) The buildings consist of three registrations. Of these, the details of the major building are shown here.
